

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/aoe-20-94	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Disease-free and overall survival in particular will be shared, as this study did not find a correlation between circumferential resection margin status and survival regardless of the definition of circumferential resection margin used.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	-
5	When will data availability begin?	From the publication date
6	When will data availability end?	Two years from the publication date, as the survival data may be updated over time.
7	To whom will you share the data?	Thoracic surgeons, surgical oncologists, and radiation oncologists who may be interested in the impact of circumferential resection margin status on survival.
8	For what type of analysis or purpose?	To determine the impact of circumferential resection margin status on patient disease-free and overall survival.
9	How or where can the data/documents be obtained?	Emails can be sent to: Jonathan.cools@mcgill.ca
10	Any other restrictions?	We may weigh the potential benefits and risks for each request and then provide data which may be shared.
