

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/pm-21-45	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	--
3	What data in particular will be shared?	Raw RNASeq data may be shared, along with corresponding deidentified and pertinent clinical data (i.e. sex, feeding status gestational and post-menstrual ages).
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	IRB approved consent form upon request.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Up to one year from publication, as data storage of sequencing data will not be maintained long-term.
7	To whom will you share the data?	Medical professionals who are interested in studying oral feeding in the newborn.
8	For what type of analysis or purpose?	To further explore developmental pathways associated with oral feeding maturation in the neonatal population.
9	How or where can the data/documents be obtained?	Email: jmaron1226@gmail.com
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
