

TRIPOD Checklist: Prediction Model Development

Section	Item	Checklist description	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract				
Title	1	Identify the study as developing and/or validating a multivariable prediction model, the target population, and the outcome to be predicted.	Page1/Line2-4	Title/Paragraph1
Abstract	2	Provide a summary of objectives, study design, setting, participants, sample size, predictors, outcome, statistical analysis, results, and conclusions.	Page2/Line29-58	Abstract/Paragraph2
Introduction				
Background and objectives	3a	Explain the medical context (including whether diagnostic or prognostic) and rationale for developing or validating the multivariable prediction model, including references to existing models.	Page3/Line60-95	Background/Paragraph3
	3b	Specify the objectives, including whether the study describes the development or validation of the model or both.	Page3/Line60-95	Background/Paragraph3
Methods				
Source of data	4a	Describe the study design or source of data (e.g., randomized trial, cohort, or registry data), separately for the development and validation data sets, if applicable.	Page4/Line98-106	Patients data/Paragraph4
	4b	Specify the key study dates, including start of accrual; end of accrual; and, if applicable, end of follow-up.	Page4/Line98-106	Patients data/Paragraph4
Participants	5a	Specify key elements of the study setting (e.g., primary care, secondary care, general population) including number and location of centres.	Page4/Line98-106	Patients data/Paragraph4
	5b	Describe eligibility criteria for participants.	Page4/Line98-106	Patients data/Paragraph4
	5c	Give details of treatments received, if relevant.	Page4/Line98-106	Patients data/Paragraph4
Outcome	6a	Clearly define the outcome that is predicted by the prediction model, including how and when assessed.	Page5-7/Line117-184	Results/Paragraph6-13
	6b	Report any actions to blind assessment of the outcome to be predicted.	Page5-7/Line117-184	Results/Paragraph6-13
Predictors	7a	Clearly define all predictors used in developing or validating the multivariable prediction model, including how and when they were measured.	Page7-11/Line185-314	Discussion/Paragraph14-20
	7b	Report any actions to blind assessment of predictors for the outcome and other predictors.	Page7-11/Line185-314	Discussion/Paragraph14-20
Sample size	8	Explain how the study size was arrived at.	Page7-11/Line185-314	Discussion/Paragraph14-20

Missing data	9	Describe how missing data were handled (e.g., complete-case analysis, single imputation, multiple imputation) with details of any imputation method.	Page5-7/Line117-184	Results/Paragraph6-13
Statistical analysis methods	10a	Describe how predictors were handled in the analyses.	Page5-7/Line117-184	Results/Paragraph6-13
	10b	Specify type of model, all model-building procedures (including any predictor selection), and method for internal validation.	Page4/Line107-116	Statistical methods/ Paragraph5
	10d	Specify all measures used to assess model performance and, if relevant, to compare multiple models.	Page4/Line107-116	Statistical methods/ Paragraph5
Risk groups	11	Provide details on how risk groups were created, if done.	Page5-7/Line117-184	Results/Paragraph6-13
Results				
Participants	13a	Describe the flow of participants through the study, including the number of participants with and without the outcome and, if applicable, a summary of the follow-up time. A diagram may be helpful.	Page5-7/Line117-184	Results/Paragraph6-13
	13b	Describe the characteristics of the participants (basic demographics, clinical features, available predictors), including the number of participants with missing data for predictors and outcome.	Page5-7/Line117-184	Results/Paragraph6-13
Model development	14a	Specify the number of participants and outcome events in each analysis.	Page5-7/Line117-184	Results/Paragraph6-13
	14b	If done, report the unadjusted association between each candidate predictor and outcome.	Page5-7/Line117-184	Results/Paragraph6-13
Model specification	15a	Present the full prediction model to allow predictions for individuals (i.e., all regression coefficients, and model intercept or baseline survival at a given time point).	Page5-7/Line117-184	Results/Paragraph6-13
	15b	Explain how to use the prediction model.	Page5-7/Line117-184	Results/Paragraph6-13
Model performance	16	Report performance measures (with CIs) for the prediction model.	Page5-7/Line117-184	Results/Paragraph6-13
Discussion				
Limitations	18	Discuss any limitations of the study (such as nonrepresentative sample, few events per predictor, missing data).	Page7-11/Line185-314	Discussion/Paragraph4-20
Interpretation	19b	Give an overall interpretation of the results, considering objectives, limitations, and results from similar studies, and other relevant evidence.	Page7-11/Line185-314	Discussion/Paragraph4-20
Implications	20	Discuss the potential clinical use of the model and implications for future research.	Page11/Line315-323	Conclusion/Paragraph21
Other information				
Supplementary information	21	Provide information about the availability of supplementary resources, such as study protocol, Web calculator, and data sets.	Page11/Line315-323	Conclusion/Paragraph21
Funding	22	Give the source of funding and the role of the funders for the present study.	Page11/Line325-329	Funding/Paragraph22
