

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/jgo-21-627	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Overall survival and disease-free survival will be shared, and we also found frailty and low PNI as risk factors for other causes of mortality by multivariate analysis, which has seldom been provided in previous studies.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	The statistical analysis plan, informed consent form, and clinical study report will also be shared.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Medical oncologists and surgeons who are interested in studies of colorectal cancer surgery for elderly patients.
8	For what type of analysis or purpose?	For analysis to investigate the long-term outcomes of elderly patients 80 years and older after colorectal cancer surgery in comparison with younger age groups.
9	How or where can the data/documents be obtained?	Emails can be sent to the address below to obtain the shared data: ogacchi@med.kurume-u.ac.jp
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
