MOOSE (Meta-analyses of Observational Studies in Epidemiology) Checklist

ltem No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph			
Report	Reporting of Background					
1	Problem definition					
2	Hypothesis statement					
3	Description of Study Outcome(s)					
4	Type of exposure or intervention used					
5	Type of study design used					
6	Study population					
Report	Reporting of Search Strategy					
7	Qualifications of searchers (eg, librarians and investigators)					
8	Search strategy, including time period included in the synthesis and keywords					
9	Effort to include all available studies, including contact with authors					
10	Databases and registries searched					
11	Search software used, name and version, including special features used (eg, explosion)					
12	Use of hand searching (eg, reference lists of obtained articles)					
13	List of citations located and those excluded, including justification					
14	Method for addressing articles published in languages other than English					
15	Method of handling abstracts and unpublished studies					
16	Description of any contact with authors					

Reporting of Methods				
17	Description of relevance or appropriateness of studies assembled for assessing the hypothesis to be tested			
18	Rationale for the selection and coding of data (eg, sound clinical principles or convenience)			
19	Documentation of how data were classified and coded (eg, multiple raters, blinding, and interrater reliability)			
20	Assessment of confounding (eg, comparability of cases and controls in studies where appropriate)			
21	Assessment of study quality, including blinding of quality assessors; stratification or regression on possible predictors of study results			
22	Assessment of heterogeneity			
23	Description of statistical methods (eg, complete description of fixed or random effects models, justification of whether the chosen models account for predictors of study results, dose-response models, or cumulative meta-analysis) in sufficient detail to be replicated			
24	Provision of appropriate tables and graphics			
Report	ing of Results	1		
25	Graphic summarizing individual study estimates and overall estimate			
26	Table giving descriptive information for each study included			
27	Results of sensitivity testing (eg, subgroup analysis)			
28	Indication of statistical uncertainty of findings			
Reporting of Discussion				
29	Quantitative assessment of bias (eg, publication bias)			
30	Justification for exclusion (eg, exclusion of non-English-language citations)			
31	Assessment of quality of included studies			
Report	ing of Conclusions			
32	Consideration of alternative explanations for observed results			
33	Generalization of the conclusions (ie, appropriate for the data presented and within the domain of the literature review)			
34	Guidelines for future research			
35	Disclosure of funding source
