

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/jgo-22-700	
Item	Question	Authors' Response (place “-” if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	N/A
3	What data in particular will be shared?	The survival data and transplant characteristics of patients with esophageal cancer after allogeneic stem cell transplantation has rarely been reported and will be shared
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol may be shared upon reasonable request.
5	When will data availability begin?	From date of publication
6	When will data availability end?	Two years within the publication date, since the technique or survival data may be updated over time.
7	To whom will you share the data?	Oncologist including malignant hematologist and transplant physicians who will benefit from our data and results.
8	For what type of analysis or purpose?	For analysis of charactersitics and outcomes of patients esophageal cancer after allogeneic transplantation
9	How or where can the data/documents be obtained?	Email can be sent to corresponding author jeff.lipton@uhn.ca for obtaining shared data
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared after consultation with institutional REB at University Health network Toronto.
