STROBE Statement—checklist of items that should be included in reports of observational studies

	Item No.	Recommendation	Page No.	Relevant text from manuscript
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Page2/Line3-13	Abstract/Para1-2
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Page2/Line14-26	Abstract/Para3-4
Introduction				
Background/rationale	2	Explain the scientific background and rationale for the investigation being reported	Page3/Line2- Page4/Line16	Introduction/Para1-3
Objectives	3	State specific objectives, including any prespecified hypotheses	Page4/Line17-18	Introduction/Para3
Methods				
Study design	4	Present key elements of study design early in the paper	Page5/Line1-8	Material and Method/Para1
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Page5/Line1- Page6/Line7	Material and Method/Para1- 2
Participants	6	<ul> <li>(a) Cohort study—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up</li> <li>Case-control study—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls</li> <li>Cross-sectional study—Give the eligibility criteria, and the sources and methods of selection of participants</li> </ul>	Page5/Line1- Page6/Line7	Material and Method/Para1- 2
		(b) Cohort study—For matched studies, give matching criteria and number of exposed and unexposed Case-control study—For matched studies, give matching criteria and the number of controls per case	Page5/Line1- Page6/Line7	Material and Method/Para1- 2
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Page5/Line10- Page6/Line7	Material and Method/Para2
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Page5/Line10- Page6/Line7	Material and Method/Para2
Bias	9	Describe any efforts to address potential sources of bias	Page5/Line10- Page6/Line7	Material and Method/Para2

Study size 10 Explain how the study size was arrived at N/A N/A
---

Continued on next page

Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	Page6/Line9- 16	Material and Method/Para3
Statistical methods	12	( <i>a</i> ) Describe all statistical methods, including those used to control for confounding	Page6/Line9-	Material and Method/Para2
		(b) Describe any methods used to examine subgroups and interactions	Page6/Line9- 16	Material and Method/Para2
		(c) Explain how missing data were addressed	N/A	No missing data
		(d) Cohort study—If applicable, explain how loss to follow-up was addressed	N/A	No missing data
		Case-control study-If applicable, explain how matching of cases and controls was addressed		
		<i>Cross-sectional study</i> —If applicable, describe analytical methods taking account of sampling strategy		
		( <u>e</u> ) Describe any sensitivity analyses	N/A	No missing data
Results				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	Page7/Line3-4	Result/Para1
		(b) Give reasons for non-participation at each stage	Page7/Line3-4	Result/Para1
		(c) Consider use of a flow diagram	N/a	N/a
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on	Page7/Line3-	Result/Para1
		exposures and potential confounders	Page8/Line9	
		(b) Indicate number of participants with missing data for each variable of interest	Page7/Line3-	Result/Para1
			Page8/Line9	
		(c) Cohort study—Summarise follow-up time (eg, average and total amount)	Page7/Line3-	Result/Para1
0	17*		Page8/Line9	D
Outcome data	15*	Cohort study—Report numbers of outcome events or summary measures over time	Page8/Line11-	Result/Para2-4
		Case-control study—Report numbers in each exposure category, or summary measures of exposure	Page10/Line5 N/a	N/a
		Case-control study—Report numbers in each exposure category, or summary measures of exposure Cross-sectional study—Report numbers of outcome events or summary measures	N/a N/a	N/a N/a
Main results	14			Result/Para2-4
wain results	16	( <i>a</i> ) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Page8/Line11- Page10/Line5	Kesull/Para2-4

(b) Report category boundaries when continuous variables were categorized	Page8/Line11-	Result/Para2-4
	Page10/Line5	
(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time	Page8/Line11-	Result/Para2-4
period	Page10/Line5

Other analyses	17	Report other analyses done-eg analyses of subgroups and interactions, and sensitivity analyses	N/A	No analysis
Discussion				
Key results	18	Summarise key results with reference to study objectives	Page10/Line1-	Discussion/Para1
			16	
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss	Page13/Line18-	Discussion/Para6
		both direction and magnitude of any potential bias	Page14/Line4	
Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of	Page10/Line1-	Discussion/Para1-6
		analyses, results from similar studies, and other relevant evidence	Page14/Line4	
Generalisability	21	Discuss the generalisability (external validity) of the study results	Page14/Line5-7	Discussion/Para7
Other informati	on			
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the	N/A	No funding
		original study on which the present article is based		

\*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

**Note:** An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at <a href="http://www.strobe-statement.org">www.strobe-statement.org</a>.

Article Information: https://dx.doi.org/10.21037/jgo-22-281

\*As the checklist was provided upon initial submission, the page number/line number reported may be changed due to copyediting and may not be referable in the published version. In this case, the section/paragraph may be used as an alternative reference.
