Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Relevant data about that MRCP improved the accuracy, sensitivity and specificity of the diagnosis of cholangiocarcinoma, and had a higher detection rate for small-diameter lesions.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or data may be updated over time
7	To whom will you share the data?	For those interested in further exploring the accuracy of magnetic resonance cholangiography and multi-slice spiral computed tomography in the diagnosis of cholangiocarcinoma.
8	For what type of analysis or purpose?	To investigate the accuracy of magnetic resonance cholangiography and multi-slice spiral computed tomography in the diagnosis of cholangiocarcinoma.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: guchunwei1968@suda.edu.cn
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
