

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/jgo-24-227	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	We are willing to share the raw data regarding the detection of EFNA4 mRNA expression levels in various pancreatic cancer cell lines. This includes the qPCR results that were used to screen and select the optimal interference chain for the knockdown of EFNA4 in PANC-1 and SW1990 cell lines.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan and study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	There is no set end date for data availability at this time. We aim to maintain long-term accessibility of the data.
7	To whom will you share the data?	Researchers, clinicians, and institutions who are interested in pancreatic cancer research.
8	For what type of analysis or purpose?	For any analysis or purpose related to pancreatic cancer research, including but not limited to further understanding of EFNA4 expression and its clinical implications.
9	How or where can the data/documents be obtained?	The data/documents can be obtained by submitting a request to the corresponding author via email.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
