The significance of perioperative coagulation and fibrinolysis related parameters after lung surgery for predicting venous thromboembolism: a prospective, single center study

In the article entitled “The significance of perioperative coagulation and fibrinolysis related parameters after lung surgery for predicting venous thromboembolism: a prospective, single center study” that appeared on Page 2223-2230, Vol 10, No 4 (April 2018) of the *Journal of Thoracic Disease* (1), there is an error in the sentence, “Continuous variables were expressed as the mean \pm standard deviation (SD)”, which is under the title “Statistical analysis”. The correct sentence should be “Continuous variables were expressed as the mean \pm standard error (SE)”.

The authors regret the error.
