

## Data Sharing Statement

<b>Article Info</b>	http://dx.doi.org/10.21037/jtd-20-1605.	
<b>Item</b>	<b>Question</b>	<b>Authors' Response (place "-" if not applicable)</b>
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Perioperative myocardial infarction data after PCI in particular will be shared, and we also found CRP and NLR were independent risk factors for perioperative myocardial infarction.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or database may be updated over time.
7	To whom will you share the data?	Cardiovascular physicians who are interested in studies of relationship between inflammation markers and perioperative myocardial infarction.
8	For what type of analysis or purpose?	For analysis to explore the relationship between inflammation markers and perioperative myocardial infarction.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: 3313011@zju.edu.cn
10	Any other restrictions?	We hope that researchers who request data provide their research proposal first and we may balance the potential benefits and risks for each request and then provide the data that could be shared.
