

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/jtd-20-3075 .	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The survival data from symptomatic versus asymptomatic patients, as well as the HR of a symptomatic status at lung cancer diagnosis from our multivariate Cox regression model.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	We provide supplemental material where an analysis of symptomatic patients categorized according to their symptoms (respiratory and non-respiratory), as well as an analysis of their survival and a multivariate Cox regression model according to this categorization, can be found. Also a 1:1 propensity score matched paired analysis is provided.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Approximately two years within the publication date, since the survival date may be updated.
7	To whom will you share the data?	Pulmonologists and all professionals involved in the diagnosis process of patients with lung cancer.
8	For what type of analysis or purpose?	For underlying the importance of early diagnosis in lung cancer from a "real life" daily practice perspective.
9	How or where can the data/documents be obtained?	In addition to the main manuscript, supplemental material will be provided.
10	Any other restrictions?	-
