Section/item	ltem No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Page2/Line2-5	Abstract/Paragraph2
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Page2/Line2-22	Abstract/Paragraph1
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Page3/Line2-19	Introduction/Paragraph2
Objectives	3	State specific objectives, including any prespecified hypotheses	Page3/Line20-21	Introduction/Paragraph3
Methods				
Study design	4	Present key elements of study design early in the paper	Page4/Line1-2	Methods/Paragraph1
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Page3/Line32-33	Methods/Paragraph1
Participants	6	<ul> <li>(a) <i>Cohort study</i>—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up</li> <li><i>Case-control study</i>—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls</li> <li><i>Cross-sectional study</i>—Give the eligibility criteria, and the sources and methods of selection of participants</li> </ul>	Page4/Line3-8	Methods/Paragraph2
		(b) <b>Cohort study</b> —For matched studies, give matching criteria and number of exposed and unexposed <b>Case-control study</b> —For matched studies, give matching criteria and the number of controls per case	Page4/Line9-15	Methods/Paragraph3
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Page4/Line17-20	Methods/Paragraph4
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Page4/Line16-33	Methods/Paragraph2-5
Bias	9	Describe any efforts to address potential sources of bias	Page5/Line3-7	Methods/Paragraph6
Study size	10	Explain how the study size was arrived at	Page4/Line2	Methods/Paragraph1
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	Page4/Line22-29	Methods/Paragraph4

## STROBE Statement—checklist of items that should be included in reports of observational studies

1		1	r
12	(a) Describe all statistical methods, including those used to control for confounding	Page5/Line10-12	Methods/Paragraph7
	(b) Describe any methods used to examine subgroups and interactions	Page5/Line12-15	Methods/Paragraph7
	(c) Explain how missing data were addressed	Page4/Line3-7	Methods/Paragraph2
	(d) <b>Cohort study</b> —If applicable, explain how loss to follow-up was addressed <b>Case-control study</b> —If applicable, explain how matching of cases and controls was addressed <b>Cross-sectional study</b> —If applicable, describe analytical methods taking account of sampling strategy	Page4/Line3-7	Methods/Paragraph2
	(e) Describe any sensitivity analyses	Page5/Line15-17	Methods/Paragraph7
13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	Page5/Line21-23	Results/Paragraph1
	(b) Give reasons for non-participation at each stage	Page4/Line1-2	Methods/Paragraph1
	(c) Consider use of a flow diagram	Page4/Line1-2	Methods/Paragraph1
14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	Page5/Line26	Results/Paragraph1
	(b) Indicate number of participants with missing data for each variable of interest	Page6/Line12-13	Results/Paragraph3
	(c) <b>Cohort study</b> —Summarise follow-up time (eg, average and total amount)	Page6/Line12	Results/Paragraph3
15*	Cohort study – Report numbers of outcome events or summary measures over time	Page6/Line12-13	Results/Paragraph3
	Case-control study – Report numbers in each exposure category, or summary measures of exposure	-	-
	Cross-sectional study – Report numbers of outcome events or summary measures	-	-
16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Page6/Line22-24	Results/Paragraph3
	(b) Report category boundaries when continuous variables were categorized	Page6/Line2-8	Results/Paragraph2
	(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	Page6/Line23	Results/Paragraph3
17	Report other analyses done-eg analyses of subgroups and interactions, and sensitivity analyses	Page6/Line20-22	Results/Paragraph3
18	Summarise key results with reference to study objectives	Page6/Line27-31	Discussion/Paragraph1
19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	Page6/Line27-31	Discussion/Paragraph1
	13* 14* 15* 16 17 18	(b) Describe any methods used to examine subgroups and interactions         (c) Explain how missing data were addressed         (d) Cohort study—If applicable, explain how loss to follow-up was addressed         Case-control study—If applicable, explain how matching of cases and controls was addressed         Cross-sectional study—If applicable, explain how matching of cases and controls was addressed         (e) Describe any sensitivity analyses         13*       (a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed         (b) Give reasons for non-participation at each stage       (c) Consider use of a flow diagram         14*       (a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders         (b) Indicate number of participants with missing data for each variable of interest       (c) Cohort study—Report numbers of outcome events or summary measures over time         Case-control study—Report numbers of outcome events or summary measures       (a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included         (b) Report category boundaries when continuous variables were categorized       (c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period         17       Report other analyses done—eg ana	Image: String 1         Project String 2           (b) Describe any methods used to examine subgroups and interactions         PrageString 12-15           (c) Explain how missing data were addressed         PrageAtLing 1-7           (c) Cohort study—If applicable, explain how loss to follow-up was addressed         PrageAtLing 1-7           (c) Cohort study—If applicable, explain how loss to follow-up was addressed         PrageAtLing 1-7           (c) Cohort study—If applicable, explain how loss to follow-up was addressed         PrageAtLing 1-7           (c) Cohort study—If applicable, explain how loss to follow-up was addressed         PrageAtLing 1-7           (a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed         PrageAtLing 1-2           (c) Consider use of a flow diagram         PrageAtLing 1-2         (c) Consider use of a flow diagram         PrageAtLing 1-2           (a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders         PrageAtLing 1-2           (b) Indicate number of participants with missing data for each variable of interest         PrageAtLing 1-2           (c) Cohort study—Report numbers of outcome events or summary measures of exposure         -           Cross-sectional study—Report numbers in each exposure category, or summary measures of exposure         -           (c) Gi

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	Page7/Line13	Discussion/Paragraph2-4			
Generalisability	21	Discuss the generalisability (external validity) of the study results	Page9/Line2-7	Discussion/Paragraph8			
Other information							
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	Page9/Line10-11	Acknowledgment/Paragra ph1			

\*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

**Note:** An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
