

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/jtd-20-3479.	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The survival data in particular will be shared. We found that the long-term clinical outcomes of type I hybrid total arch repair are acceptable. But in younger patients, the incidence of late adverse aortic events, such as endoleaks, etc., is slightly higher.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Cardiovascular surgeons who are interested in studies of hybrid aortic arch repair
8	For what type of analysis or purpose?	For analysis to evaluate the safety and durability of hybrid technique in aortic arch repair.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: Zhangbowen_doctor@126.com.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
