

## Data Sharing Statement

|                     |  |  |
|---------------------|--|--|
| <b>Article Info</b> | <a href="https://dx.doi.org/10.21037/jtd-21-1550">https://dx.doi.org/10.21037/jtd-21-1550</a>  |  |
| <b>Item</b>         | <b>Question</b>  | <b>Authors' Response<br/>(place “-” if not applicable)</b>   |
| 1                   | Would you like to share data collected for your study to others?   | Yes  |
| 2                   | If not, would you like to share the reason for your decision?  | -  |
| 3                   | What data in particular will be shared?  | The comparison in intra- and postoperative outcome between consultant and trainees and the comparison in outcome between PI<3 and PI>3 for both arterial and venous grafts.  |
| 4                   | Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code. | Clinical study report  |
| 5                   | When will data availability begin?   | From the publication date  |
| 6                   | When will data availability end?   | Five years within publication date   |
| 7                   | To whom will you share the data?   | Cardiothoracic surgeons  |
| 8                   | For what type of analysis or purpose?  | To compare the intra- and postoperative outcomes, including TTFM, of isolated CABG performed by a single consultant versus trainees and to determine the relationship between the pulsatility index (PI) and postoperative outcomes. |
| 9                   | How or where can the data/ documents be obtained?  | Emails could be sent to the address below to obtain the shared data:<br>dr.shahrul@um.edu.my   |

|    |                         |  |
|----|-------------------------|--|
| 10 | Any other restrictions? | We may balance the potential benefits and risks for each request and then provide the data that could be shared. |
