

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/jtd-21-1523	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes of course we could share them with other authors
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The authors have the database of this work
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	No problem, this protocol can be shared. It was presented to the Ethics Committee, which asks for all these requirements.
5	When will data availability begin?	This could be at the time required by the interested party, who will have to request it from the author
6	When will data availability end?	We do not consider a definite time
7	To whom will you share the data?	The data may be shared with researchers who are interested in the subject, mainly surgeons and/or rheumatologists. However, internists may have concerns and this may be extended to this specialty.
8	For what type of analysis or purpose?	The analysis can be shared on the clinical part and the type of surgical requirements that were considered.
9	How or where can the data/documents be obtained?	With the lead author Dr. Maria Elena Soto
10	Any other restrictions?	If there is another main restriction and it is when the interested party shows an appropriate objective and gives the main author who can share data according to the objective and approach made by the interested party and has the appropriate use.
