

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/jtd-22-1747	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes. Upon request, we are happy to share data.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The diagnostic yields and biopsy sizes will be shared. We would also be happy to discuss and share technical lessons learnt from the two needles.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	-
5	When will data availability begin?	From the publication date. Upon request data is available at the time of publication.
6	When will data availability end?	Two years within the publication date, since the technique may have evolved and equipment may have changed over time.
7	To whom will you share the data?	Interventional pulmonologists who have an interest in mediastinal and hilar lymph node sampling. General thoracic physicians and medical oncologists may also benefit.
8	For what type of analysis or purpose?	For further investigation of the yields and approaches to mediastinal and hilar lymph node sampling.
9	How or where can the data/documents be obtained?	Upon request from the authors. Emails could be sent to MichaelV.Brown@sa.gov.au
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
