

## Data Sharing Statement

<b>Article Info</b>	<a href="https://dx.doi.org/10.21037/jtd-23-745">https://dx.doi.org/10.21037/jtd-23-745</a>	
<b>Item</b>	<b>Question</b>	<b>Authors' Response (place "-" if not applicable)</b>
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	We are particularly willing to share the NGS gene testing data of GGO-LUAD patients, as these patients were generally less likely to choose high-throughput and high-sensitivity multi-gene sequencing.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol, statistical analysis plan, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date.
7	To whom will you share the data?	Medical oncologists and thoracic surgeons who are interested in studies of genetic characteristics of LUAD.
8	For what type of analysis or purpose?	For analysis to summarize and study the genetic characteristics of GGO-LUAD patients.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: <a href="mailto:zwp525@163.com">zwp525@163.com</a>
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
