Section/item	ltem No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	P3L7-L11	Abstract
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	P3-4	Abstract
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Р6	Introduction
Objectives	3	State specific objectives, including any prespecified hypotheses	P6L9-L14	Introduction
Methods				
Study design	4	Present key elements of study design early in the paper	P6-12	Methods
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Рб-8	Methods
Participants	6	 (a) Cohort study – Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up Case-control study – Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study – Give the eligibility criteria, and the sources and methods of selection of participants 	P7L5-L11	Methods
		(b) Cohort study —For matched studies, give matching criteria and number of exposed and unexposed Case-control study —For matched studies, give matching criteria and the number of controls per case	P7L5-L11	Methods
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	P7L11-P8L8	Methods
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	P7L11-P8L8	Methods
Bias	9	Describe any efforts to address potential sources of bias	P7L9-L11	Methods
Study size	10	Explain how the study size was arrived at	P7L6-L11	Methods
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	P7L11-P8L8	Methods

STROBE Statement-checklist of items that should be included in reports of observational studies

(a) Describe all statistical methods, including those used to control for confounding	D111.15 D101.0	
	P11L15-P12L2	Methods
(b) Describe any methods used to examine subgroups and interactions	P11L15-P12L2	Methods
(c) Explain how missing data were addressed	N/A No missing data	N/A No missing data
(d) Cohort study —If applicable, explain how loss to follow-up was addressed Case-control study —If applicable, explain how matching of cases and controls was addressed Cross-sectional study —If applicable, describe analytical methods taking account of sampling strategy	N/A There was no loss to follow-up.	N/A There was no loss to follow-up.
(e) Describe any sensitivity analyses	N/A Sensitivity	N/A Sensitivity
(a) Report numbers of individuals at each stage of study – eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	P7L5-L11	Methods
(b) Give reasons for non-participation at each stage	P7L5-L11	Methods
(c) Consider use of a flow diagram	Figure1	Figure1
(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	P7L11-P8L8	Methods
(b) Indicate number of participants with missing data for each variable of interest	N/A No missing data	N/A No missing data
(c) <i>Cohort study</i> —Summarise follow-up time (eg, average and total amount)	Average: Three years	Not described
Cohort study – Report numbers of outcome events or summary measures over time	P12L4-P14L3, Table1, 3	Results
Case-control study-Report numbers in each exposure category, or summary measures of exposure	N/A This is not a case -	N/A This is not a case -
Cross-sectional study-Report numbers of outcome events or summary measures	N/A This sis not a	N/A This sis not a
(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Table3	Table3
(b) Report category boundaries when continuous variables were categorized	Table4	Table4
(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	N/A not relevant	N/A not relevant
Report other analyses done – eg analyses of subgroups and interactions, and sensitivity analyses	N/A no other analysis	N/A no other analysis
Summarise key results with reference to study objectives	P14L5-L10	Discussion
Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	P16L17-P17L6	Limitation
	(c) Explain how missing data were addressed (d) Cohort study — If applicable, explain how loss to follow-up was addressed Case-control study — If applicable, explain how matching of cases and controls was addressed Cross-sectional study — If applicable, explain how matching of cases and controls was addressed Cross-sectional study — If applicable, describe analytical methods taking account of sampling strategy (e) Describe any sensitivity analyses (a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed (b) Give reasons for non-participation at each stage (c) Consider use of a flow diagram (a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders (b) Indicate number of participants with missing data for each variable of interest (c) Cohort study—Summarise follow-up time (eg, average and total amount) Cohort study—Report numbers in each exposure category, or summary measures of exposure Cross-sectional study—Report numbers of outcome events or summary measures (a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included (b) Report category boundaries when continuous variables were categorized (c) I relevant, consi	(c) Explain how missing data were addressed N/A No missing data (c) Explain how missing data were addressed N/A No missing data (d) Cohort study—If applicable, explain how loss to follow-up was addressed N/A There was no loss to follow-up. <i>Cross-sectional study</i> —If applicable, explain how matching of cases and controls was addressed N/A No missing data <i>Cross-sectional study</i> —If applicable, describe analytical methods taking account of sampling strategy N/A Sensitivity (a) Report numbers of individuals at each stage of study—eq numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed P7L5-L11 (b) Give reasons for non-participation at each stage P7L5-L11 P7L5-L11 (c) Consider use of a flow diagram Figure1 P7L5-L11 (c) Consider use of a flow diagram Figure1 P7L5-L11 (a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders P7L1-P8L8 (b) Indicate number of participants with missing data for each variable of interest N/A No missing data P7L3-L11-P8L8 (c) Cohort study—Report numbers of outcome events or summary measures of exposure N/A This is not a case - Cross-sectional study—Report numbers of outcome events or summary measures of exposure N/A This is not a case - Cros-sectional study—Report numbers of outcome ev

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	P14L5-P16L15	Discussion			
Generalisability	21	Discuss the generalisability (external validity) of the study results	P14L5-P16L15	Discussion			
Other information							
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	N/A no funding	N/A no funding			

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
