

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/jtd-23-1581	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	This study represents the first investigation into the application of the preset wrapping technique in total arch replacement for TAAD with AC, and compared its operative outcomes with the conventional non-preset technique, especially for the preset group to reduce the operation time and blood product consumption.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, surgical wrapping video, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Five years within the publication date, since the technique or survival data may be updated over time.
7	To whom will you share the data?	Cardiovascular surgeons.
8	For what type of analysis or purpose?	For analysis to evaluate the safety and unexpected hemostatic effects of preset techniques for type A aortic dissection.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: 897988958@qq.com
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
