

STROBE Statement—checklist of items that should be included in reports of observational studies

Section/item	Item No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Page 1/Line 1–3	Title page/Paral 1
		(b) Provide in the abstract an informative and balanced summary of what was done and what was	Page 3/Line 32–62	Abstract/Paral 1–4
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Page 6–7/Line 88–122	Introduction/Paral 1–2
Objectives	3	State specific objectives, including any prespecified hypotheses	Page 7/Line 188–122	Introduction/Paral 2
Methods				
Study design	4	Present key elements of study design early in the paper	Page 7–8/Line 126–143	Methods/Paral 1
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Page 7–10/Line 126–180	Methods/Paral 1–4
Participants	6	(a) Cohort study —Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up Case-control study —Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study —Give the eligibility criteria, and the sources and methods of selection of	Page 7–8/Line 126–143	Methods/Paral 1
		(b) Cohort study —For matched studies, give matching criteria and number of exposed and unexposed	Not matched studies	Not matched studies
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Page 10/Line 183–189	Methods/Paral 5

Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Page 8-7/Line 145-180	Methods/Paral 2-4
Bias	9	Describe any efforts to address potential sources of bias	Page 10/Line 183-189	Methods/Paral 5
Study size	10	Explain how the study size was arrived at	Page 7-8/Line 125-143	Methods/Paral 1
Quantitative	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	Page 9-10/Line 165-180	Methods/Paral 4

Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	Page 10/Line 183–189	Methods/Paral 5
		(b) Describe any methods used to examine subgroups and interactions	Not applicable in this section, described in the section of Result of subgroup analysis	Not applicable in this section, described in the section of Result of subgroup analysis
		(c) Explain how missing data were addressed	Not applicable in this study	Not applicable in this study
		(d) <i>Cohort study</i> —If applicable, explain how loss to follow-up was addressed <i>Case-control study</i> —If applicable, explain how matching of cases and controls was addressed	Page 10/Line 183–189	Methods/Paral 5
		(e) Describe any sensitivity analyses	Not applicable in this study	Not applicable in this study
Results				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	Page 10–11/Line 192–207	Results/Paral 1
		(b) Give reasons for non-participation at each stage	Not applicable in this study	Not applicable in this study
		(c) Consider use of a flow diagram	Not applicable in this study	Not applicable in this study
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information	Page 10–11/Line 192–207	Results/Paral 1
		(b) Indicate number of participants with missing data for each variable of interest	Not applicable in this study	Not applicable in this study

		(c) <i>Cohort study</i> —Summarise follow-up time (eg, average and total amount)	Page 12–13/Line 224–247	Results/Paral 3
Outcome data	15*	<i>Cohort study</i> —Report numbers of outcome events or summary measures over time	Page 10–11/Line 192–207	Results/Paral 1
		<i>Case-control study</i> —Report numbers in each exposure category, or summary measures of exposure	Not applicable in this study	Not applicable in this study
		<i>Cross-sectional study</i> —Report numbers of outcome events or summary measures	Not applicable in this study	Not applicable in this study
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were	Page 11–14/Line 209–247	Results/Paral 2–3
		(b) Report category boundaries when continuous variables were categorized	Page 11–14/Line 209–247	Results/Paral 2–3
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	Not applicable in this study	Not applicable in this study
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	Page 13–14/Line 249–257	Results/Paral 4
Discussion				
Key results	18	Summarise key results with reference to study objectives	Page 14–15/Line 260–281	Discussion/Paral 1
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	Page 18–19/Line 349–361	Discussion/Paral 6

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	Page 15–18/Line 282–348	Discussion/Paral 2–5
Generalisability	21	Discuss the generalisability (external validity) of the study results	Not applicable in this study	Not applicable in this study
Other information				
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	Page 20/Line 384–388	Acknowledgments/Paral 1

*Give information separately for cases and controls in case–control studies and, if applicable, for exposed and unexposed groups in cohort and cross–sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at <http://www.plosmedicine.org/>, Annals of Internal Medicine at <http://www.annals.org/>, and Epidemiology at <http://www.epidem.com/>). Information on the STROBE Initiative is available at www.strobe-statement.org.
