

## STROBE Statement—checklist of items that should be included in reports of observational studies

Section/item	Item No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	page1/line1-3	in the title
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	page2/line31-60	section1/paragraph1-5
<b>Introduction</b>				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	page3/line63-90,page4/line91-95	section2/paragraph1-3
Objectives	3	State specific objectives, including any prespecified hypotheses	page4/line96-102	section2/paragraph4
<b>Methods</b>				
Study design	4	Present key elements of study design early in the paper	page2/line58-60	section2/paragraph5
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	page4/line105-116	section3/paragraph1
Participants	6	(a) <b>Cohort study</b> —Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up <b>Case-control study</b> —Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls <b>Cross-sectional study</b> —Give the eligibility criteria, and the sources and methods of selection of participants	page4/line118-120,page5/line121-128	section3/paragraph2-3
		(b) <b>Cohort study</b> —For matched studies, give matching criteria and number of exposed and unexposed <b>Case-control study</b> —For matched studies, give matching criteria and the number of controls per case	-	-
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	page6/178-180,page7/line181-202,page8/213-221	section3/paragraph10-11,paragraph13
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	page7/line204-210,page8/line211-212	section3/paragraph12
Bias	9	Describe any efforts to address potential sources of bias	page8/line224-227	section3/paragraph14
Study size	10	Explain how the study size was arrived at	page4/line105-108	section3/paragraph1
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	page5/line129-150,page6/line151-180,page7/line181-191	section3/paragraph4-10

Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	page8/line223-225	section3/paragraph14
		(b) Describe any methods used to examine subgroups and interactions	page9/line262-268	section4/paragraph3
		(c) Explain how missing data were addressed		
		(d) <b>Cohort study</b> —If applicable, explain how loss to follow-up was addressed <b>Case-control study</b> —If applicable, explain how matching of cases and controls was addressed <b>Cross-sectional study</b> —If applicable, describe analytical methods taking account of sampling strategy	page8/line224-228	section3/paragraph14
		(e) Describe any sensitivity analyses	-	-
<b>Results</b>				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	page8/line238-240,page9/line241-249	section4/paragraph1
		(b) Give reasons for non-participation at each stage	-	-
		(c) Consider use of a flow diagram	page4/line113	section3/paragraph1
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	page8/line239-240,page9/line241-248 and line269-270,page10/line271	section4/paragraph1 and paragraph4
		(b) Indicate number of participants with missing data for each variable of interest	-	-
		(c) <b>Cohort study</b> —Summarise follow-up time (eg, average and total amount)	-	-
Outcome data	15*	<b>Cohort study</b> —Report numbers of outcome events or summary measures over time	-	-
		<b>Case-control study</b> —Report numbers in each exposure category, or summary measures of exposure	page10/line271-293	section4/paragraph4
		<b>Cross-sectional study</b> —Report numbers of outcome events or summary measures	-	-
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	page8/line229-235	section3/paragraph15
		(b) Report category boundaries when continuous variables were categorized	page7/line 205-210,page8/line211-212	section3/paragraph12
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period		
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	page10/line288-293	section4/paragraph4
<b>Discussion</b>				
Key results	18	Summarise key results with reference to study objectives	page14/line399-415	section5/paragraph6
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	page15/line426-433	section5/paragraph8

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	page15/line435-437	section6/paragraph1
Generalisability	21	Discuss the generalisability (external validity) of the study results	page15/line437-439	section6/paragraph1
<b>Other information</b>				
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	page15/line447-448	section8/paragraph1

\*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

**Note:** An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at <http://www.plosmedicine.org/>, Annals of Internal Medicine at <http://www.annals.org/>, and Epidemiology at <http://www.epidem.com/>). Information on the STROBE Initiative is available at [www.strobe-statement.org](http://www.strobe-statement.org).
