Section/item	ltem No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Page2/line5-16	Abstract/Para1-2
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Page2/line17-P3/L25	Abstract/Para3-4
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Page3/line25-P4/L56	Introduction/Para1-2
Objectives	3	State specific objectives, including any prespecified hypotheses	Page4/line56-62	Introduction/Para3
Methods				
Study design	4	Present key elements of study design early in the paper	Page4/line64-P5/L70	Methods/Para1
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Page5/line71-83	Methods/Para2
Participants	6	 (a) Cohort study—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up Case-control study—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study—Give the eligibility criteria, and the sources and methods of selection of participants 	Page5/line71-83	Methods/Para2
		(b) Cohort study —For matched studies, give matching criteria and number of exposed and unexposed Case-control study —For matched studies, give matching criteria and the number of controls per case	NA	NA
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Page5/line84-90	Methods/Para3
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Page5/line84-90	Methods/Para3
Bias	9	Describe any efforts to address potential sources of bias	Page4/line64-P5/L70	Methods/Para1
Study size	10	Explain how the study size was arrived at	Page4/line64-P5/L70	Methods/Para1
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	Page5/line91-P6/L98	Methods/Para4

STROBE Statement-checklist of items that should be included in reports of observational studies

12	(a) Describe all statistical methods, including those used to control for confounding	Page5/line91-P6/L98	Methods/Para4
	(b) Describe any methods used to examine subgroups and interactions	Page5/line91-P6/L98	Methods/Para4
	(c) Explain how missing data were addressed	Page5/line91-P6/L98	Methods/Para4
	(d) Cohort study —If applicable, explain how loss to follow-up was addressed Case-control study —If applicable, explain how matching of cases and controls was addressed Cross-sectional study —If applicable, describe analytical methods taking account of sampling strategy	Page5/line91-P6/L98	Methods/Para4
	(e) Describe any sensitivity analyses	Page5/line91-P6/L98	Methods/Para4
13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	Page6/line100-104	Results/Para1
	(b) Give reasons for non-participation at each stage	Page6/line100-104	Results/Para1
	(c) Consider use of a flow diagram	NA	NA
14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	Page6/line105-111	Results/Para2
	(b) Indicate number of participants with missing data for each variable of interest	Page6/line105-111	Results/Para2
	(c) Cohort study —Summarise follow-up time (eg, average and total amount)	Page6/line100-104	Results/Para1
15*	Cohort study – Report numbers of outcome events or summary measures over time	Page6/line105-111	Results/Para2
	Case-control study – Report numbers in each exposure category, or summary measures of exposure	NA	NA
	Cross-sectional study – Report numbers of outcome events or summary measures	NA	NA
16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Page6/line112-P7/L121	Results/Para3
	(b) Report category boundaries when continuous variables were categorized	Page6/line122-131	Results/Para4
	(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	Page6/line132-P8/L137	Results/Para5
17	Report other analyses done-eg analyses of subgroups and interactions, and sensitivity analyses	Page6/line122-131	Results/Para4
18	Summarise key results with reference to study objectives	Page6/line139-143	Discussion/Para1
19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	Page9/line184-189	Discussion/Para5
	13* 14* 15* 16 17 18	13* 10* 10* (b) Describe any methods used to examine subgroups and interactions (c) Explain how missing data were addressed (c) Explain how missing data were addressed Case-control study—If applicable, explain how loss to follow-up was addressed Case-control study—If applicable, explain how matching of cases and controls was addressed Case-control study—If applicable, describe analytical methods taking account of sampling strategy (e) Describe any sensitivity analyses (e) Describe any sensitivity analyses 13* (a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed (b) Give reasons for non-participation at each stage (c) Consider use of a flow diagram 14* (a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders (b) Indicate number of participants with missing data for each variable of interest (c) Cohort study—Report numbers of outcome events or summary measures over time 15* Cohort study—Report numbers of outcome events or summary measures of exposure Cross-sectional study—Report numbers of outcome events or summary measures (a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included <	10 0 0 0 (b) Describe any methods used to examine subgroups and interactions Page5/line91-P6/L98 Page5/line91-P6/L98 (c) Explain how missing data were addressed Page5/line91-P6/L98 Page5/line91-P6/L98 (d) Cohort study—If applicable, explain how loss to follow-up was addressed Page5/line91-P6/L98 Case-control study—If applicable, explain how matching of cases and controls was addressed Page5/line91-P6/L98 (a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed Page6/line100-104 (b) Give reasons for non-participation at each stage Page6/line100-104 Page6/line105-111 (c) Consider use of a flow diagram NA NA 14* (a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and page6/line105-111 Page6/line105-111 (c) Cohort study—Report numbers of outcome events or summary measures over time Page6/line105-111 (c) Give natury—Report numbers of outcome events or summary measures of exposure NA 15* Cohort study—Report numbers of outcome events or summary measures of exposure NA 16 (a) Give unadjusted estinnates and, if applicable, confound

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	Page8/line144-P9/L183	Discussion/Para2-4				
Generalisability	21	Discuss the generalisability (external validity) of the study results	Page9/line190-193	Discussion/Para6				
Other information								
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	NA	NA				

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
