

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/tcr-20-3017	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The survival data in particular will be shared, for the incidence of extranodal natural killer T-cell lymphoma, nasal-type is low, survival data will help other researchers better understand this rare disease.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Python code will also be shared if requested, because it will help promote the development of prognostic models.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Sixteen months within the publication date, since the survival date or python code may be updated over time.
7	To whom will you share the data?	Medical oncologists and otolaryngologists who are interested in studies of extranodal natural killer T-cell lymphoma, nasal-type.
8	For what type of analysis or purpose?	For analysis to evaluate the prognosis in patients with extranodal natural killer T-cell lymphoma, nasal-type.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: 305374168@qq.com or prlizhu@qq.com .
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
