## <u>Materials Design Analysis Reporting (MDAR)</u> Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.io/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

# **Materials**

Antibodies	Yes (indicate where provided: section/paragraph)	n/a
For commercial reagents, provide supplier	In present study, all of results that were used the	N/A
name, catalogue number and RRID, if available.	public database to perform, no experiment in this	
Cell materials	Yes (indicate where provided: section/paragraph)	n/a
Cell lines: Provide species information, strain.	In present study, all of results that were used the	N/A
Provide accession number in repository <b>OR</b>	public database to perform, no experiment in this	
supplier name, catalog number, clone number,	study.	
OR RRID		
Primary cultures: Provide species, strain, sex of	In present study, all of results that were used the	N/A
origin, genetic modification status.	public database to perform, no experiment in this	
Experimental animals	Yes (indicate where provided: section/paragraph)	n/a
Laboratory animals: Provide species, strain, sex, age,	In present study, all of results that were used the	N/A
genetic modification status. Provide accession	public database to perform, no experiment in this	
number in repository <b>OR</b> supplier name, catalog	study.	
number, clone number, <b>OR</b> RRID		
Animal observed in or captured from the	In present study, all of results that were used the	N/#
field: Provide species, sex and age where	public database to perform, no experiment in this	
possible	study.	
Model organisms: Provide Accession number	In present study, all of results that were used the	N/A
in repository (where relevant) <b>OR</b> RRID	public database to perform, no experiment in this	
Plants and microbes	Yes (indicate where provided: section/paragraph)	n/a
Plants: provide species and strain, unique accession	In present study, all of results that were used the	N/A
number if available, and source (including location	public database to perform, no experiment in this	
for collected wild specimens)	study.	
Microbes: provide species and strain, unique	In present study, all of results that were used the	N/A
accession number if available, and source	public database to perform, no experiment in this	
	· ·	
Human research participants	Yes (indicate where provided: section/paragraph)	n/a
Identify authority granting ethics approval (IRB or	In present study, all of results that were used the	N//
equivalent committee(s), provide reference number	public database to perform, no experiment in this	
for approval.	study.	
Provide statement confirming informed consent	In present study, all of results that were used the	N/#
obtained from study participants.	public database to perform, no experiment in this	
Report on age and sex for all study participants.	In present study, all of results that were used the	N/#

### <u>Design</u>

Study protocol	Yes (indicate where provided: section/paragraph)	n/a
For clinical trials, provide the trial registration	In present study, all of results that were used the	N/A
number <b>OR</b> cite DOI in manuscript.	public database to perform, no experiment in this	
Laboratory protocol	Yes (indicate where provided: section/paragraph)	n/a
Provide DOI or other citation details if detailed step-	In present study, all of results that were used the	N/A
by-step protocols are available.	public database to perform, no experiment in this	
Experimental study design (statistics details)	Yes (indicate where provided: section/paragraph)	n/a
State whether and how the following have been	In present study, all of results that were used the	N/A
done <b>, or</b> if they were not carried out.	public database to perform, no experiment in this	
Sample size determination	In present study, all of results that were used the	N/A
Randomisation	In present study, all of results that were used the	N/A
Blinding	In present study, all of results that were used the	N/A
Inclusion/exclusion criteria	In present study, all of results that were used the	N/A
Sample definition and in-laboratory replication	Yes (indicate where provided: section/paragraph)	n/a
State number of times the experiment was	In present study, all of results that were used the	N/A
replicated in laboratory	public database to perform, no experiment in this	
Define whether data describe technical or biological	In present study, all of results that were used the	N/A
replicates	public database to perform, no experiment in this	
Ethics	Yes (indicate where provided: section/paragraph)	n/a
Studies involving human participants: State details of	In present study, all of results that were used the	N/A
authority granting ethics approval (IRB or equivalent	public database to perform, no experiment in this	
committee(s), provide reference number for approval.	study.	
Studies involving experimental animals: State details	In present study, all of results that were used the	N/A
of authority granting ethics approval (IRB or	public database to perform, no experiment in this	
equivalent committee(s), provide reference number	study.	
for approval.		
Studies involving specimen and field samples: State if	In present study, all of results that were used the	N/A
relevant permits obtained, provide details of	public database to perform, no experiment in this	
authority approving study; if none were required,	study.	
explain why.		
	Yes (indicate where provided: section/paragraph)	n/a
Dual Use Research of Concern (DURC)		
Dual Use Research of Concern (DURC)If study is subject to dual use research of concern,	N/A	N/A
		N/A

# <u>Analysis</u>

Attrition	Yes (indicate where provided: section/paragraph)	n/a
State if sample or data point from the analysis is excluded, and whether the criteria for exclusion were determined and specified in advance.	See page 4, line 17-32, page 5, line 1-26.Methods.	
Statistics	Yes (indicate where provided: section/paragraph)	n/a
Describe statistical tests used and justify choice of tests.	See page 4, line 5-15.Methods.	
Data Availability	Yes (indicate where provided: section/paragraph)	n/a
State whether newly created datasets are available, including protocols for access or restriction on access.	See page 4, line 17-32, page 5, line 1-26.Methods.	
If data are publicly available, provide accession number in repository or DOI or URL.	See page 4, line 17-32, page 5, line 1-26.Methods.	
If publicly available data are reused, provide accession number in repository or DOI or URL, where possible.	See page 4, line 17-32, page 5, line 1-26.Methods.	
Code Availability	Yes (indicate where provided: section/paragraph)	n/a
For all newly generated code and software essential for replicating the main findings of the study:		
State whether the code or software is available.	N/A	N/A
If code is publicly available, provide accession number in repository, or DOI or URL.	N/A	N/A

### **Reporting**

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of		
discipline-specific guidelines, established and		
endorsed through community initiatives. Journals		
have their own policy about requiring specific		
guidelines and recommendations to complement		
MDAR.		
State if relevant guidelines (eg., ICMJE, MIBBI,	ICMJE guidelines were followed, as the journal follows	
ARRIVE) have been followed, and whether a checklist	ICMJE recommendations for publication.	
(eg., CONSORT, PRISMA, ARRIVE) is provided with		
the manuscript.
