<u>Materials Design Analysis Reporting (MDAR)</u> Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.io/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

Materials

Antibodies	Yes (indicate where provided: section/paragraph)	n/a
For commercial reagents, provide supplier		n/a
name, catalogue number and RRID, if available.		
Cell materials	Yes (indicate where provided: section/paragraph)	n/a
Cell lines: Provide species information, strain.	Breast cancer data sets containing MALAT1 gene	
Provide accession number in repository OR	expression are extracted from the GEO database	
supplier name, catalog number, clone number,	(https://www.ncbi.nlm.nih.gov/gds). All data are from	
OR RRID	the Affymetrix human genome U133 plus 2.0 array and	
	U133A array. A total of 6 data sets are finally	
	determined, namely GSE6532, GSE9195, GSE20711,	
	GSE31448, GSE42568, and GSE1456. (page7 line181-185)	
Primary cultures: Provide species, strain, sex of		n/a
origin, genetic modification status.		
Experimental animals	Yes (indicate where provided: section/paragraph)	n/a
Laboratory animals: Provide species, strain, sex, age,		n/a
genetic modification status. Provide accession		
number in repository OR supplier name, catalog		
number, clone number, OR RRID		
Animal observed in or captured from the		n/a
field: Provide species, sex and age where		
possible		
Model organisms: Provide Accession number		n/a
in repository (where relevant) OR RRID		
Plants and microbes	Yes (indicate where provided: section/paragraph)	n/a
Plants: provide species and strain, unique accession		n/a
number if available, and source (including location		
for collected wild specimens)		
Microbes: provide species and strain, unique		n/a
accession number if available, and source		
Human research participants	Yes (indicate where provided: section/paragraph)	n/a
Identify authority granting ethics approval (IRB or		n/a
equivalent committee(s), provide reference number		
for approval.		
Provide statement confirming informed consent		n/a
obtained from study participants.		
Report on age and sex for all study participants.		n/a

<u>Design</u>

Study protocol	Yes (indicate where provided: section/paragraph)	n/a
For clinical trials, provide the trial registration		n/a
number OR cite DOI in manuscript.		
Laboratory protocol	Yes (indicate where provided: section/paragraph)	n/a
Provide DOI or other citation details if detailed step-	res (indicate where provided, section, paragraphy	n/a
by-step protocols are available.		n/a
Experimental study design (statistics details)	Yes (indicate where provided: section/paragraph)	n/a
State whether and how the following have been done, or if they were not carried out.		n/a
Sample size determination		n/a
Randomisation		n/a
Blinding		n/a
Inclusion/exclusion criteria		n/a
Sample definition and in-laboratory replication	Yes (indicate where provided: section/paragraph)	n/a
State number of times the experiment was	res (indicate where provided, section, paragraph)	n/a
replicated in laboratory		ny a
Define whether data describe technical or biological		n/a
replicates		, a
Ethics	Vac (indicate whom any ideal, conting (new grant)	
Studies involving human participants: State details of	Yes (indicate where provided: section/paragraph)	n/a
authority granting ethics approval (IRB or equivalent		n/a
committee(s), provide reference number for		
approval.		
Studies involving experimental animals: State details		n/a
of authority granting ethics approval (IRB or		iiy a
equivalent committee(s), provide reference number		
for approval.		
Studies involving specimen and field samples: State if		n/a
relevant permits obtained, provide details of		, -
authority approving study; if none were required,		
explain why.		
	Yes (indicate where provided: section/paragraph)	n/a
Dual Use Research of Concern (DURC)	Tes inducate where provided. Section/Daragraphi	
Dual Use Research of Concern (DURC) If study is subject to dual use research of concern,	res (indicate where provided, section/paragraph)	n/a
Dual Use Research of Concern (DURC) If study is subject to dual use research of concern, state the authority granting approval and reference	res (indicate where provided, section/paragraph)	n/a

Analysis

Attrition	Yes (indicate where provided: section/paragraph)	n/a
State if sample or data point from the analysis is excluded, and whether the criteria for exclusion were determined and specified in advance.		n/a
Statistics	Yes (indicate where provided: section/paragraph)	n/a
Describe statistical tests used and justify choice of tests.	RevMan 5.3 software is adopted for meta-analysis, and in the meta-analysis, a random effects model (DerSimonian and Laird method) is used to calculate the combined hazard ratio and 95% confidence interval.(page8 line191-193)	
Data Availability	Yes (indicate where provided: section/paragraph)	n/a
State whether newly created datasets are available, including protocols for access or restriction on access.		n/a
If data are publicly available, provide accession number in repository or DOI or URL.	Breast cancer data sets containing MALAT1 gene expression are extracted from the GEO database (https://www.ncbi.nlm.nih.gov/gds). All data are from the Affymetrix human genome U133 plus 2.0 array and U133A array. A total of 6 data sets are finally determined, namely GSE6532, GSE9195, GSE20711, GSE31448, GSE42568, and GSE1456.(page7 line181- 185)	
If publicly available data are reused, provide accession number in repository or DOI or URL, where possible.		n/a
Code Availability	Yes (indicate where provided: section/paragraph)	n/a
For all newly generated code and software essential for replicating the main findings of the study:		n/a
State whether the code or software is available.		n/a
If code is publicly available, provide accession number in repository, or DOI or URL.		n/a

Reporting

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of discipline-specific guidelines, established and endorsed through community initiatives. Journals have their own policy about requiring specific guidelines and recommendations to complement MDAR.		n/a
State if relevant guidelines (eg., ICMJE, MIBBI, ARRIVE) have been followed, and whether a checklist (eg., CONSORT, PRISMA, ARRIVE) is provided with the manuscript.	ICMJE guidelines were followed, as the journal follows ICMJE recommendations for publication
