<u>Materials Design Analysis Reporting (MDAR)</u> Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.io/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

Materials

Antibodies	Yes (indicate where provided: section/paragraph)	n/a
For commercial reagents, provide supplier		Yes
name, catalogue number and RRID, if available.		

Cell materials	Yes (indicate where provided: section/paragraph)	n/a
Cell lines: Provide species information, strain.		Yes
Provide accession number in repository OR supplier name, catalog number, clone number,		
OR RRID		
Primary cultures: Provide species, strain, sex of		Yes
origin, genetic modification status.		

Experimental animals	Yes (indicate where provided: section/paragraph)	n/a
Laboratory animals: Provide species, strain, sex, age, genetic modification status. Provide accession number in repository OR supplier name, catalog number, clone number, OR RRID		Yes
Animal observed in or captured from the field: Provide species, sex and age where possible		Yes
Model organisms: Provide Accession number in repository (where relevant) OR RRID		Yes

Plants and microbes	Yes (indicate where provided: section/paragraph)	n/a
Plants: provide species and strain, unique accession number if available, and source (including location for collected wild specimens)		Yes
Microbes: provide species and strain, unique accession number if available, and source		Yes

Human research participants	Yes (indicate where provided: section/paragraph)	n/a
Identify authority granting ethics approval (IRB or		Yes
equivalent committee(s), provide reference number		
for approval.		
Provide statement confirming informed consent		Yes
obtained from study participants.		
Report on age and sex for all study participants.		Yes

<u>Design</u>

Study protocol	Yes (indicate where provided:	n/a
For clinical trials, provide the trial registration		Yes
number OR cite DOI in manuscript.		
Laboratory protocol	Yes (indicate where provided:	n/a
Provide DOI or other citation details if detailed step-	·	Yes
by-step protocols are available.		
Experimental study design (statistics details)	Yes (indicate where provided:	n/a
State whether and how the following have been		Yes
done, or if they were not carried out.		
Sample size determination		Yes
Randomisation		Yes
Blinding		Yes
Inclusion/exclusion criteria		Yes
Sample definition and in-laboratory replication	Yes (indicate where provided:	n/a
State number of times the experiment was		Yes
replicated in laboratory		
Define whether data describe technical or biological		Yes
replicates		
Ethics	Yes (indicate where provided:	n/a
Studies involving human participants: State details of	Too (Manager Process	Yes
authority granting ethics approval (IRB or equivalent		
committee(s), provide reference number for		
approval.		
Studies involving experimental animals: State details		Yes
of authority granting ethics approval (IRB or		
equivalent committee(s), provide reference number		
for approval.		
Studies involving specimen and field samples: State if		Yes
relevant permits obtained, provide details of		
authority approving study; if none were required,		
explain why.		
Dual Use Research of Concern (DURC)	Yes (indicate where provided:	n/a
	Yes (indicate where provided:	n/a Yes, This is a study based
Dual Use Research of Concern (DURC)	Yes (indicate where provided:	•

Analysis

Attrition	Yes (indicate where provided: section/paragraph)	n/a
State if sample or data point from the analysis is		Yes
excluded, and whether the criteria for exclusion were		
determined and specified in advance.		

Statistics	Yes (indicate where provided: section/paragraph)	n/a
Describe statistical tests used and justify choice of	Yes, Abstract/Para2	
tests.		

Data Availability	Yes (indicate where provided: section/paragraph)	n/a
State whether newly created datasets are available, including protocols for access or restriction on access.	Yes, This is explained in a footnote	
If data are publicly available, provide accession number in repository or DOI or URL.	Yes, This is explained in a footnote	
If publicly available data are reused, provide accession number in repository or DOI or URL, where possible.	Yes, This is explained in a footnote	

Code Availability	Yes (indicate where provided: section/paragraph)	n/a
For all newly generated code and software essential	Yes, Materials and Methods/paragraph(1-4)	
for replicating the main findings of the study:		
State whether the code or software is available.	Yes, Materials and Methods/paragraph(1-4)	
If code is publicly available, provide accession number in repository, or DOI or URL.	Yes, Materials and Methods/paragraph(1-4)	

Reporting

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of discipline-specific guidelines, established and endorsed through community initiatives. Journals have their own policy about requiring specific guidelines and recommendations to complement MDAR.	Yes, Introduction/Paragraph (3)	
State if relevant guidelines (eg., ICMJE, MIBBI, ARRIVE) have been followed, and whether a checklist (eg., CONSORT, PRISMA, ARRIVE) is provided with the manuscript.	ICMJE guidelines were followed, as the journal follows ICMJE recommendations for publication.
