## <u>Materials Design Analysis Reporting (MDAR)</u> Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.io/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

# **Materials**

Antibodies	Yes (indicate where provided: section/paragraph)	n/a
For commercial reagents, provide supplier	Cav-1 antibody (Abcam, ab32577) and GAPDH antibody	
name, catalogue number and RRID, if available.	(Abcam, ab9485), goat anti-rabbit IgG (Abcam, ab6721)	

Cell materials	Yes (indicate where provided: section/paragraph)	n/a
Cell lines: Provide species information, strain.	The human BC cell lines: MCF-1, American Type Culture	
Provide accession number in repository <b>OR</b>	Collection (ATCC, Manassas, VA, USA);	
supplier name, catalog number, clone number,	The human BC cell lines : MDA-MB-231,American Type	
OR RRID	Culture Collection (ATCC, Manassas, VA, USA).	
Primary cultures: Provide species, strain, sex of	NA	NA
origin, genetic modification status.		

Experimental animals	Yes (indicate where provided: section/paragraph)	n/a
Laboratory animals: Provide species, strain, sex, age,	severe combined immunodeficiency (SCID) mice, Five-	
genetic modification status. Provide accession	week-old, female.	
number in repository <b>OR</b> supplier name, catalog		
number, clone number, <b>OR</b> RRID		
Animal observed in or captured from the	severe combined immunodeficiency (SCID) mice, Five-	NA
field: Provide species, sex and age where	week-old, female, Beijing Weitong Lihua Company	
possible		
Model organisms: Provide Accession number	n=8 each group	NA
in repository (where relevant) <b>OR</b> RRID		

Plants and microbes	Yes (indicate where provided: section/paragraph)	n/a
<b>Plants:</b> provide species and strain, unique accession number if available, and source (including location for collected wild specimens)	NA	NA
Microbes: provide species and strain, unique accession number if available, and source	NA	NA

Human research participants	Yes (indicate where provided: section/paragraph)	n/a
Identify authority granting ethics approval (IRB or	NA	NA
equivalent committee(s), provide reference number		
for approval.		
Provide statement confirming informed consent	NA	NA
obtained from study participants.		
Report on age and sex for all study participants.	NA NA	NA

### **Design**

Study protocol	Yes (indicate where provided: section/paragraph)	n/a
For clinical trials, provide the trial registration number <b>OR</b> cite DOI in manuscript.	NA	NA
Laboratory protocol	Yes (indicate where provided: section/paragraph)	n/a
Provide DOI or other citation details if detailed step- by-step protocols are available.	doi: 10.1002/path.4217	
Experimental study design (statistics details)	Yes (indicate where provided: section/paragraph)	n/a
State whether and how the following have been done, <b>or</b> if they were not carried out.	No	N A
Sample size determination	NA	N
Randomisation	NA	N
Blinding	NA	N
Inclusion/exclusion criteria	NA	N
Sample definition and in-laboratory replication	Yes (indicate where provided: section/paragraph)	n/a
State number of times the experiment was replicated in laboratory	NA , , , , , , , , , , , , , , , , , , ,	N A
Define whether data describe technical or biological replicates	NA	N A
Ethics	Yes (indicate where provided: section/paragraph)	n/a
Studies involving human participants: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	NA	NA
Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.	Footnote.	
Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.	NA	NA

Dual Use Research of Concern (DURC)	Yes (indicate where provided: section/paragraph)	n/a
If study is subject to dual use research of concern,	NA	NA
state the authority granting approval and reference		
number for the regulatory approval		

# **Analysis**

Attrition	Yes (indicate where provided: section/paragraph)	n/a
State if sample or data point from the analysis is	NA	N
excluded, and whether the criteria for exclusion were		Α
determined and specified in advance.		

Statistics	Yes (indicate where provided: section/paragraph)	n/a
Describe statistical tests used and justify choice of	Due to the uneven distribution of samples, the Wilcoxon signed-	
tests.	rank test was used to differentiate Cav-1 expression in normal	
	tissues (NTs) and BC tissues, and the Kolmogorov-Smirnov test	
	was used to analyze the difference in Cav-1 expression and clinical	
	pathology. SPSS 20 was used to analyze the data with a pairwise t-	
	test and analysis of variance, and P<0.05 was considered	
	statistically significant.	

Data Availability	Yes (indicate where provided: section/paragraph)	n/a
State whether newly created datasets are available,	NA	NA
including protocols for access or restriction on		
access.		
If data are publicly available, provide accession	https://www.ncbi.nlm.nih.gov/geo/query/acc.cgi?acc=	NA
number in repository or DOI or URL.	GSE1456;	
If publicly available data are reused, provide	GSE1456 (platform: GPL96); GSE9574 (platform: GPL96)	
accession number in repository or DOI or URL, where		
possible.		

Code Availability	Yes (indicate where provided: section/paragraph)	n/a
For all newly generated code and software essential	NA	NA
for replicating the main findings of the study:		
State whether the code or software is available.	Yes	
If code is publicly available, provide accession	https://www.r-project.org/	
number in repository, or DOI or URL.		

# Reporting

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of	NA	N
discipline-specific guidelines, established and		Α
endorsed through community initiatives. Journals		
have their own policy about requiring specific		
guidelines and recommendations to complement		
MDAR.		
State if relevant guidelines (eg., ICMJE, MIBBI,	ICMJE guidelines were followed, as the journal follows	
ARRIVE) have been followed, and whether a checklist	ICMJE recommendations for publication.	
(eg., CONSORT, PRISMA, ARRIVE) is provided with		
the manuscript.
