| Data Sharing Statement |  |  |
|------------------------|--|--|
| Article<br>Info        | https://dx.doi.org/10.21037/tcr-21-2210  |  |
| Item                   | Question   | Authors' Response<br>(place "-" if not applicable)   |
| 1                      | Would you like to share data collected for your study to others?   | Yes.   |
| 2                      | If not, would you like to share<br>the reason for your decision?   | -  |
| 3                      | What data in particular will be shared?  | All experimental data of this study can be shared.   |
| 4                      | Any other documents will be<br>shared? Such as study<br>protocol, statistical analysis<br>plan, informed consent form,<br>clinical study report, analytic<br>code. | Study protocol, statistical analysis plan, informed<br>consent form and clinical study report will also be<br>shared if requested.         |
| 5                      | When will data availability begin?   | From the publication date.   |
| 6                      | When will data availability end?   | Two years within the publication date, since the technique or survival date may be updated over time.                                      |
| 7                      | To whom will you share the data?   | Researchers interested in the molecular<br>mechanisms by which lncRNA RUNx1-IT1<br>promotes lung cancer cell proliferation and<br>dryness. |
| 8                      | For what type of analysis or purpose?  | To study the molecular mechanism of lncRNA<br>RUNx1-IT1 promoting cancer cells.  |
| 9                      | How or where can the data/documents be obtained?   | Emails could be sent to the address below to obtain the shared data: <u>lyuf2000@126.com</u> .   |
| 10                     | Any other restrictions?  | We may balance the potential benefits and risks<br>for each request and then provide the data that<br>could be shared.                     |
