

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/tcr-21-1957	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The 70 routine blood test parameters and demographic features in our study will be shared.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan will also be shared if requested. Our study was a retrospective study, so individual consent for this retrospective analysis was waived.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique may be updated over time.
7	To whom will you share the data?	Medical oncologists and neurosurgeons who are interested in studies of brain malignant tumors.
8	For what type of analysis or purpose?	For analysis to evaluate the diagnostic value of preoperative blood test in differentiating glioblastoma, brain metastases, and primary central nervous system lymphoma.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: wanjinghai@sina.com
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
