The REMARK checklist

Item	to be reported	Reported on Page Number/Line Number	Reported on Section/Paragraph		
INTR	INTRODUCTION				
1	State the marker examined, the study objectives, and any pre-specified hypotheses.	Page 3-5/Line51-101	Introduction/Para 1-4		
MATE	ERIALS AND METHODS	1	1		
Patie	nts				
2	Describe the characteristics (e.g., disease stage or co-morbidities) of the study patients, including their source and inclusion and exclusion criteria.	Page 5-6/Line104-122	Materials and methods /Para2-3		
3	Describe treatments received and how chosen (e.g., randomized or rule-based).	Page 5-6/Line104-106	Materials and methods /Para1		
Speci	men characteristics		•		
4	Describe type of biological material used (including control samples) and methods of preservation and storage.	Page 6/Line124-125	Materials and methods /Para3		
Assay	v methods				
5	Specify the assay method used and provide (or reference) a detailed protocol, including specific reagents or kits used, quality control procedures, reproducibility assessments, quantitation methods, and scoring and reporting protocols. Specify whether and how assays were performed blinded to the study endpoint.	Page 6-7/Line126-135	Materials and methods /Para3-5		
Study	design	1	1		
6	State the method of case selection, including whether prospective or retrospective and whether stratification or matching (e.g., by stage of disease or age) was used. Specify the time period from which cases were taken, the end of the follow-up period, and the median follow-up time.	Page 5-6/Line104-122	Materials and methods /Para2-3		
7	Precisely define all clinical endpoints examined.	Page 6/Line113-114	Materials and methods /Para2		
8	List all candidate variables initially examined or considered for inclusion in models.	Page 5-6/Line104-106	Materials and methods /Para1		
9	Give rationale for sample size; if the study was designed to detect a specified effect size, give the target power and effect size.	N/A Not investigate a specified effect size	N/A Not investigate a specified effect size		
Statis	tical analysis methods		•		
10	Specify all statistical methods, including details of any variable selection procedures and other model-building issues, how model assumptions were verified, and how missing data were handled.	Page 7/Line137-139	Materials and methods /Para5		
11	Clarify how marker values were handled in the analyses; if relevant, describe methods used for cutpoint determination.	Page 7/Line131-135	Materials and methods /Para4		

RESULTS Data				
13	Report distributions of basic demographic characteristics (at least age and sex), standard (disease-specific) prognostic variables, and tumor marker, including numbers of missing values.	Page 8/Line146-154	Results/Para1	
Analy	sis and presentation			
14	Show the relation of the marker to standard prognostic variables.	Page 8-11/Line156-223	Results/Para2-5	
15	Present univariable analyses showing the relation between the marker and outcome, with the estimated effect (e.g., hazard ratio and survival probability). Preferably provide similar analyses for all other variables being analyzed. For the effect of a tumor marker on a time-to-event outcome, a Kaplan-Meier plot is recommended.	Page 8-11/Line156-223	Results/Para2-5	
16	For key multivariable analyses, report estimated effects (e.g., hazard ratio) with confidence intervals for the marker and, at least for the final model, all other variables in the model.	Page 8-11/Line156-223	Results/Para2-5	
17	Among reported results, provide estimated effects with confidence intervals from an analysis in which the marker and standard prognostic variables are included, regardless of their statistical significance.	Page 8-11/Line156-223	Results/Para2-5	
18	If done, report results of further investigations, such as checking assumptions, sensitivity analyses, and internal validation.	N/A Didn't investigate yet	N/A Didn't investigate yet	
DISC	JSSION		· · · · · ·	
19	Interpret the results in the context of the pre-specified hypotheses and other relevant studies; include a discussion of limitations of the study.	Page 11-17/Line225-338	Disscussion/Para1-6	
20	Discuss implications for future research and clinical value.	Page 17/Line340-346	Conclusion/Para1
