

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/tcr-21-2438	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The expression profiles of miRNA in senescent cells and senescent cells secreted extracellular vesicles in particular will be shared. And we established a therapy-induced senescent cell model will also be shared.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, study protocol, especially EVs extraction assay will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique may be updated over time.
7	To whom will you share the data?	Scientific researchers who are interested in studies of neuroblastoma and miRNA fields.
8	For what type of analysis or purpose?	For analysis to provide reference for clinical interpretation of the phenomenon of therapy-induced senescence.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: yyang@tjh.tjmu.edu.cn
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
