

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/tcr-22-1497	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The proliferation and apoptosis will be shared, and we also found a correlation between Hesperetin and migration and invasion of glioblastoma cells, which has seldom been provided in previous studies.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol and statistical analysis plan will be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique may be updated over time.
7	To whom will you share the data?	Medical oncologists and glioblastoma surgeons who are interested in studies of glioblastoma.
8	For what type of analysis or purpose?	For analysis to evaluate the safety of Hesperetin in glioblastoma cancer patients.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: muqcns@163.com.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
