

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/tcr-22-842	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The RNA-sequencing data in particular will be shared, and we also found lncRNA uc011fnr.2 may play an important role in the progression of AK, which has seldom been provided in previous studies.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Informed consent form will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival data may be updated over time.
7	To whom will you share the data?	Dermatologist who are interested in studies of AK.
8	For what type of analysis or purpose?	Sequencing and whole-genome analysis was performed to examine the profiles of lncRNA and mRNA expression in skin tissues from AK patients and healthy controls.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: jinshuang66@icloud.com
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
