

## Data Sharing Statement

<b>Article Info</b>	<a href="https://dx.doi.org/10.21037/tcr-22-2526">https://dx.doi.org/10.21037/tcr-22-2526</a>	
<b>Item</b>	<b>Question</b>	<b>Authors' Response (place "-" if not applicable)</b>
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The transcriptomics data in particular will be shared.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	The study protocol, statistical analysis plan will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique may be updated over time.
7	To whom will you share the data?	Medical oncologists and hematology clinicians who are interested in studies of cuproptosis-related lncRNAs.
8	For what type of analysis or purpose?	For analysis to explore the specific mechanisms of cuproptosis-related lncRNAs in AML.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: dr_huyu@126.com
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
