

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/tcr-23-1752	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes, but only partial data can be shared under specific circumstances.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	If the data is questioned or requested to be shared, we will share partial raw data based on the situation and discuss it with the database manager.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol and statistical analysis plan will be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival data may be updated over time.
7	To whom will you share the data?	Those urologists or pathologists who are interested in our research.
8	For what type of analysis or purpose?	Those who are willing to collaborate on research projects or question our data.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: yanwg11@126.com
10	Any other restrictions?	Our statistical data comes from the prostate cancer pathology digital slice database of the Pathology Department of Peking Union Medical College Hospital, and the statistical data in this database is strictly protected.
