

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/tbcr-22-22	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The 5-year metastasis-free survival data in particular will be shared in patients with breast cancer. We also found a correlation between their 5-year metastasis-free survival rates with the level of proteasomes activities, which has not been studied much.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date
6	When will data availability end?	Three years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Medical oncologists and breast surgeons who are interested in studies of cancer breast
8	For what type of analysis or purpose?	For analysis to evaluate the 5-year metastasis-free survival in breast cancer patients
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: SchaschovaEE@oncology.tomsk.ru
10	Any other restrictions?	We may balance the potential problems for each request and then provide the data that could be shared
