Reviewer Comments

**Comment 1:** It is an interesting review. The manuscript falls under the scope of the journal; It is an interesting article on breast surgical treatment after neoadjuvant systemic therapy.

In this review, the Authors present the evolution of response rates in the breast with NAC over time, and the conversion rates to BCS with NAC and NET in the modern era with a focus on patient selection, oncologic safety, and areas of controversy.

The article is presented in an intelligible fashion; The work is described expansively; it is well-structured and developed.

The abstract is appropriate for the study. The introduction and conclusions are adequate.

References are adequate and updated.

The manuscript is written in standard English; Language and grammar are acceptable.

**Reply 1:** Thank you very much for your review and comments.
