Section/item	ltem No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Page1/Line 31-34	Abstract/Paragraph 1
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Page 2/Line 21-23	Abstract/Paragraph 4
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Page 3/Line 11-13,Line 21-22, Line 32-33	Introduction/Paragraph1,2, 3
Objectives	3	State specific objectives, including any prespecified hypotheses	Page 4/Line 1-3	Introduction/Paragraph 4
Methods				
Study design	4	Present key elements of study design early in the paper	Page 4/ Line 8-18	Methods/Paragraph 1
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Page 4/Line 8, Page 5/Line 6	Methods/Paragraph 1,3
Participants	6	<ul> <li>(a) <i>Cohort study</i>—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up</li> <li><i>Case-control study</i>—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls</li> <li><i>Cross-sectional study</i>—Give the eligibility criteria, and the sources and methods of selection of participants</li> </ul>	Page 4/Line 8-18,32-34	Methods/Paragraph 1,3
		(b) <b>Cohort study</b> —For matched studies, give matching criteria and number of exposed and unexposed <b>Case-control study</b> —For matched studies, give matching criteria and the number of controls per case	N/A,because this is not matched study.	
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Page 4/Line 21-31	Methods/Paragraph 2
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Page 4/Line 21-31	Methods/Paragraph 2
Bias	9	Describe any efforts to address potential sources of bias	Page 4/Line 8-18	Methods/Paragraph 1
Study size	10	Explain how the study size was arrived at	Page 4/ Line 8-9	Methods/Paragraph 1
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	Page5/Line 9-13	Methods/Paragraph 4

## STROBE Statement-checklist of items that should be included in reports of observational studies

12			
12	(a) Describe all statistical methods, including those used to control for confounding	Page 5/ Line 13-24	Methods/Paragraph 4
	(b) Describe any methods used to examine subgroups and interactions	Page 5/Line 17-21	Methods/Paragraph 4
	(c) Explain how missing data were addressed	Page 5/Line 12-13	Methods/Paragraph 4
	(d) <b>Cohort study</b> —If applicable, explain how loss to follow-up was addressed <b>Case-control study</b> —If applicable, explain how matching of cases and controls was addressed <b>Cross-sectional study</b> —If applicable, describe analytical methods taking account of sampling strategy	Page 5/Line 911	Methods/Paragraph 4
	(e) Describe any sensitivity analyses	Page 5/Line 21-23	Methods/Paragraph 4
13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	Page 5/Line 29-34	Results/Paragraph 1
	(b) Give reasons for non-participation at each stage	Page 5/Line 29-34	Results/Paragraph 1
	(c) Consider use of a flow diagram	N/A,because we wrote the	
14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	Page 6/ Line 1-8	Results/Paragraph 1
	(b) Indicate number of participants with missing data for each variable of interest	Page 5/ Line 32-34	Results/Paragraph 1
	(c) <b>Cohort study</b> —Summarise follow-up time (eg, average and total amount)	Page 6/ Line 8-10	Results/Paragraph 1
15*	Cohort study – Report numbers of outcome events or summary measures over time	Page 6/ Line 10-11	Results/Paragraph 1
	Case-control study-Report numbers in each exposure category, or summary measures of exposure		
	Cross-sectional study-Report numbers of outcome events or summary measures		
16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Page 6/ Line 28-33, Page 7/Line 3-10	
	(b) Report category boundaries when continuous variables were categorized	The are listed in Table 1	
	(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	N/A,not relevant	
17	Report other analyses done-eg analyses of subgroups and interactions, and sensitivity analyses	Page 7/Line 27-32	Results/Paragraph 6
18	Summarise key results with reference to study objectives	Page 8/Line 2-12	Discussion/Paragraph 1
19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	Page 8/ Line 20-27	Discussion /Paragraph
	14* 15* 16 17 18	(c) Explain how missing data were addressed         (d) Cohort study — If applicable, explain how loss to follow-up was addressed         Case-control study — If applicable, explain how matching of cases and controls was addressed         Cross-sectional study — If applicable, describe analytical methods taking account of sampling strategy         (e) Describe any sensitivity analyses         13*       (a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed         (b) Give reasons for non-participation at each stage       (c) Consider use of a flow diagram         14*       (a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders         (b) Indicate number of participants with missing data for each variable of interest         (c) Cohort study—Report numbers of outcome events or summary measures over time         Case-control study—Report numbers in each exposure category, or summary measures         16       (a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included         17       Report category boundaries when continuous variables were categorized         (c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period         17       Report other analyses do	(c) Explain how missing data were addressed       Page 5/Line 12-13         (c) Explain how missing data were addressed       Page 5/Line 12-13         (d) Cohort study — If applicable, explain how loss to follow-up was addressed       Page 5/Line 9-11         (e) Describe any sensitivity analyses       Page 5/Line 21-23         (f) Cohort study — If applicable, explain how matching of cases and controls was addressed       Page 5/Line 21-23         (g) Describe any sensitivity analyses       Page 5/Line 21-23         (h) Give neasons for non-participation at each stage of study — eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed       Page 5/Line 29-34         (b) Give reasons for non-participation at each stage       Page 5/Line 29-34         (c) Consider use of a flow diagram       N/A because we wrote the potential confounders         14*       (a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders       Page 6/ Line 1.8         (b) Indicate number of participants with missing data for each variable of interest       Page 6/ Line 1.11         Case-control study — Report numbers of outcome events or summary measures over time       Page 6/ Line 1.011         Case-control study — Report numbers of outcome events or summary measures of exposure       7/Line 3.10         (b) Report category boundaries when continuous variables were categorized       T

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	Page 8 / Line 13-34, Page 9/Line 1-19	Discussion/ Paragraph 2-4			
Generalisability	21	Discuss the generalisability (external validity) of the study results	Page 9/Line 17-19	Discussion/Paragraph 4			
Other information							
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	Page 10/Line 4-7	Acknowledgments/Paragra ph 1			

\*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

**Note:** An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
