

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/tlcr-21-829	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The survival data and RNA-seq data will be shared.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form and study protocol will also be shared if requested.
5	When will data availability begin?	RNA-seq data of this study are available in the Gene Expression Omnibus (GEO) database after Jun 30, 2023. Survival data will availability from the publication date.
6	When will data availability end?	RNA-seq data of this study are available after Jun 30 and 2023, and there is no deadline. Survival data will stop sharing after 3 years after the article is published.
7	To whom will you share the data?	Medical oncologists who are interested in studies of tsRNA.
8	For what type of analysis or purpose?	For analysis to evaluate the function of tsRNA-5001a in lung adenocarcinoma patients.
9	How or where can the data/documents be obtained?	RNA-seq data of this study are available in the Gene Expression Omnibus (GEO) database. Emails could be sent to the address below to obtain the shared data: HuFang0527@163.com.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
