STROBE Statement—checklist of items that should be included in reports of observational studies

	Item No.	Recommendation	Page No.	Relevant text from manuscript
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract (checked)	Page 3	manuscript line 40
		(b) Provide in the abstract an informative and balanced summary of what was done and what was	Page 3	manuscript line 47-56
		found (checked)		
Introduction				
Background/rationale	2	Explain the scientific background and rationale for the investigation being reported (checked)	Page 4-5	manuscript line 72-85
Objectives	3	State specific objectives, including any prespecified hypotheses (checked)	Page 5	manuscript line 82-85
Methods				
Study design	4	Present key elements of study design early in the paper (checked)	Page 5	manuscript line 90-101
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure,	Page 5	manuscript line 90-93
		follow-up, and data collection (checked)		
Participants	6	(a) Cohort study—Give the eligibility criteria, and the sources and methods of selection of	Page 5	manuscript line 90-101
		participants. Describe methods of follow-up		
		Case-control study—Give the eligibility criteria, and the sources and methods of case		
		ascertainment and control selection. Give the rationale for the choice of cases and controls		
		(checked)		
		Cross-sectional study—Give the eligibility criteria, and the sources and methods of selection of		
		participants		
		(b) Cohort study—For matched studies, give matching criteria and number of exposed and	N/A	N/A
		unexposed		
		Case-control study—For matched studies, give matching criteria and the number of controls per		
		case		
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers.	Page 6	manuscript line 118-127
		Give diagnostic criteria, if applicable (checked)		
Data sources/	8*	For each variable of interest, give sources of data and details of methods of assessment	N/A	N/A
measurement		(measurement). Describe comparability of assessment methods if there is more than one group		
Bias	9	Describe any efforts to address potential sources of bias	N/A	N/A
Study size	10	Explain how the study size was arrived at (checked)	Page 5	manuscript line 90-101

Continued on next page

Quantitative	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which	Page 7-8	manuscript line 147-157
variables		groupings were chosen and why (checked)		
Statistical	12	(a) Describe all statistical methods, including those used to control for confounding (checked)	Page 6-7	manuscript line 129-142
methods		(b) Describe any methods used to examine subgroups and interactions	N/A	N/A
		(c) Explain how missing data were addressed	N/A	N/A
		(d) Cohort study—If applicable, explain how loss to follow-up was addressed	N/A	N/A
		Case-control study—If applicable, explain how matching of cases and controls was addressed		
		Cross-sectional study—If applicable, describe analytical methods taking account of sampling		
		strategy		
		(e) Describe any sensitivity analyses	N/A	N/A
Results				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined	N/A	N/A
		for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed		
		(b) Give reasons for non-participation at each stage	N/A	N/A
		(c) Consider use of a flow diagram (checked)	Page 7-8	manuscript line 146-157, figure 1
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on	Page 8	manuscript line 159-169, table 1
		exposures and potential confounders (checked)		
		(b) Indicate number of participants with missing data for each variable of interest	N/A	N/A
		(c) Cohort study—Summarise follow-up time (eg, average and total amount) (checked)	Page 9	manuscript line 178-188
Outcome data	15*	Cohort study—Report numbers of outcome events or summary measures over time	N/A	N/A
		Case-control study—Report numbers in each exposure category, or summary measures of exposure	Page 9	manuscript line 178-188, table 4
		(checked)		
		Cross-sectional study—Report numbers of outcome events or summary measures	N/A	N/A
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision	Page 9-10	manuscript line 190-203 table 3-4
		(eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were		
		included (checked)		
		(b) Report category boundaries when continuous variables were categorized	N/A	N/A
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time	N/A	N/A
		period

Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses (checked)	page 9	manuscript line 184-188 table 2, figure 2		
		(CHECKEU)		supplementary table 1		
Discussion				supplementary table 1		
Key results	18	Summarise key results with reference to study objectives (checked)	page 10	manuscript line 206-214		
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss	page 12	manuscript line 256-260		
		both direction and magnitude of any potential bias (checked)				
Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of	page 12	manuscript line 256-260		
		analyses, results from similar studies, and other relevant evidence (checked)				
Generalisability	21	Discuss the generalisability (external validity) of the study results (checked)	page 12	manuscript line 256-257		
Other information						
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the	page 13	manuscript line 264-266		
		original study on which the present article is based (checked)				

<sup>\*</sup>Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

**Note:** An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at <a href="www.strobe-statement.org">www.strobe-statement.org</a>.
