

## Data Sharing Statement

<b>Article Info</b>	<a href="https://dx.doi.org/10.21037/tlcr-22-467">https://dx.doi.org/10.21037/tlcr-22-467</a>	
<b>Item</b>	<b>Question</b>	<b>Authors' Response (place "-" if not applicable)</b>
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The authors confirm that de-identified outcomes data can be considered for sharing.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival data may be updated over time.
7	To whom will you share the data?	Data can be shared with other investigators considering similar clinical questions, especially RNA-seq analysis of pulmonary hypertension.
8	For what type of analysis or purpose?	For comparison with their own responses from patients.
9	How or where can the data/documents be obtained?	Emails could be sent to the email address below to obtain the shared details from the corresponding authors upon reasonable request.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
