

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/tlcr-23-4	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The demographic information and survival data in will be shared. However, we will not provide patient identification information, including hospitalization number, name, and contact information, to protect patient privacy. And the patient's medical unit information is not available.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival data may be updated over time.
7	To whom will you share the data?	Clinicians and medical researchers interested in severe lung cancer.
8	For what type of analysis or purpose?	Our data can be used in comparative studies with data from other medical centers for severe lung cancer.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: 2321699483@qq.com.
10	Any other restrictions?	Our data was collected by ten clinicians/medical students in three medical centers; if there is a situation where our data is used for article publication, please be sure to attach the source of the data and give credit to our team for their hard work.
