

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/tlcr-22-831	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	All tables, figures, and supplemental data submitted with this manuscript will be made publically available. In addition, any anonymized data not included in this article will be shared, according to good clinical practice, with qualified investigators upon reasonable request.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	No other documents will be shared.
5	When will data availability begin?	Data availability will begin upon publication of this manuscript.
6	When will data availability end?	Data sharing will end in 12 years from the publication of this manuscript (in year 2035). Individualized participant data may be destroyed, as consistent with IRB protocol, at an earlier date. However, all aggregate, de-identified data will be kept and will be available until 2035.
7	To whom will you share the data?	Data may be shared with qualified researchers and investigators upon request to the corresponding author.
8	For what type of analysis or purpose?	Data may be shared to allow for reproducibility of this study and results, to compare results from this and other studies (as in a meta-analysis), to clarify any questions identified by a reader, or to satisfy intellectual curiosity from interested readers.
9	How or where can the data/documents be obtained?	Data and documents not published with this manuscript may be obtained by contacting the corresponding author, Chad Heatwole (chad_heatwole@urmc.rochester.edu).
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data to be shared.
