

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/tlcr-24-717	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The survival data in particular will be shared, and we also found a correlation between blood biomarkers and prognosis, which has seldom been provided in previous studies.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan and analytic code will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival data may be updated over time.
7	To whom will you share the data?	Medical oncologists who are interested in studies of neoadjuvant chemo-immunotherapy.
8	For what type of analysis or purpose?	For analysis to evaluate the correlation between blood biomarkers and prognosis in lung cancer patients.
9	How or where can the data/documents be obtained?	The data analyzed in this study are available from the corresponding authors (Feng Li or Jian Zeng) on reasonable request.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
