

STROBE Statement—checklist of items that should be included in reports of observational studies

Section/item	Item No	Recommendation	Reported on Page Number/Line Number	Reported on Section/Paragraph
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Pag1 L4	Title page
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Pag2 L3-32	Abstract +
Introduction				
Background/ rationale	2	Explain the scientific background and rationale for the investigation being reported	Pag3 L2-29	Introduction
Objectives	3	State specific objectives, including any prespecified hypotheses	Pag3 L29-33 Pag.4.L1-2	Introduction
Methods				
Study design	4	Present key elements of study design early in the paper	Pag4. L6	Material and methods
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Pag4 L8-11	Material and methods
Participants	6	(a) Cohort study —Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up Case-control study —Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study —Give the eligibility criteria, and the sources and methods of selection of participants	NA	NA
		(b) Cohort study —For matched studies, give matching criteria and number of exposed and unexposed Case-control study —For matched studies, give matching criteria and the number of controls per case	Pag.4 L14-27 b) cohort study	Material and methods
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Pag.8 L2-3	Material and methods
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Pag. 6 L2-32 Pag.7 L2-24	Material and methods/data collection
Bias	9	Describe any efforts to address potential sources of bias	Pag.8 L2-3	Material and methods
Study size	10	Explain how the study size was arrived at	Pag.8 L6-10	Material and +
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	Pag.7 L27-34 Pag. 8 L1-10	Material and methods/statistical +

Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	Pag.7 L27-34	+	Material and	+
		(b) Describe any methods used to examine subgroups and interactions	Pag.7 L27-34	+	Material and	+
		(c) Explain how missing data were addressed	Retrospective cohort stud	+	N/A	+
		(d) Cohort study —If applicable, explain how loss to follow-up was addressed Case-control study —If applicable, explain how matching of cases and controls was addressed Cross-sectional study —If applicable, describe analytical methods taking account of sampling strategy	Retrospective cohort study N/A		N/A	
		(e) Describe any sensitivity analyses	N/A		N/A	
Results						
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed	Pag.8 L13-30		Results	
		(b) Give reasons for non-participation at each stage	Pag-8 L16-16		Results	
		(c) Consider use of a flow diagram	N/A		N/A	
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders	Pag.8 L13-30		Results	
		(b) Indicate number of participants with missing data for each variable of interest	N/A		N/A	
		(c) Cohort study —Summarise follow-up time (eg, average and total amount)	Pag.8 L22		Results	+
Outcome data	15*	Cohort study —Report numbers of outcome events or summary measures over time	Pag.10 L12-33		Results	
		Case-control study —Report numbers in each exposure category, or summary measures of exposure	N/A		N/A	
		Cross-sectional study —Report numbers of outcome events or summary measures	N/A		N/A	
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included	Pag.10 L28-33		Results	
		(b) Report category boundaries when continuous variables were categorized	N/A		N/A	
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period	N/A		N/A	
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses	Pag.10 L28-33		Results	
Discussion						
Key results	18	Summarise key results with reference to study objectives	Pag. 11 L14-34	+	Discussion	
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias	Pag.13 L10-20		Discussion	

Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence	Pag.13 L10-20	Discussion
Generalisability	21	Discuss the generalisability (external validity) of the study results	Pag.13 L16-18	Discussion
Other information				
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based	Pag. 13 L29-30	Discussion

*Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at <http://www.plosmedicine.org/>, Annals of Internal Medicine at <http://www.annals.org/>, and Epidemiology at <http://www.epidem.com/>). Information on the STROBE Initiative is available at www.strobe-statement.org.
