

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/jhmhp-21-70	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	No
2	If not, would you like to share the reason for your decision?	We are conducting further research out of this data set, and would like to preserve the ability to publish future work that is unique to our institution. Additionally, because this data set includes information about our employees' well-being, we have concerns over the potentially sensitive nature of the findings and their confidentiality. Lastly, our study of ACTs is ongoing, and some of the possible research questions from this data set will not be published until we can explore them longitudinally. If another entity were to publish those questions from this data set alone, it would undermine our ability for later longitudinal scholarship.
