<u>Materials Design Analysis Reporting (MDAR)</u> Checklist for Authors

The MDAR framework establishes a minimum set of requirements in transparent reporting applicable to studies in the life sciences (see Statement of Task: doi:10.31222/osf.io/9sm4x.). The MDAR checklist is a tool for authors, editors and others seeking to adopt the MDAR framework for transparent reporting in manuscripts and other outputs. Please refer to the MDAR Elaboration Document for additional context for the MDAR framework.

Materials

Antibodies	Yes (indicate where provided: section/paragraph)	n/a
For commercial reagents, provide supplier		
name, catalogue number and RRID, if available.		\checkmark
Cell materials	Yes (indicate where provided: section/paragraph)	n/a
Cell lines: Provide species information, strain.		
Provide accession number in repository OR		
supplier name, catalog number, clone number,		\checkmark
OR RRID		
Primary cultures: Provide species, strain, sex of		
origin, genetic modification status.		\checkmark
Experimental animals	Yes (indicate where provided: section/paragraph)	n/a
Laboratory animals: Provide species, strain, sex, age,		
genetic modification status. Provide accession		\checkmark
number in repository OR supplier name, catalog		
number, clone number, OR RRID		
Animal observed in or captured from the		
field: Provide species, sex and age where		\checkmark
possible		
Model organisms: Provide Accession number		
in repository (where relevant) OR RRID		\checkmark
Plants and microbes	Yes (indicate where provided: section/paragraph)	n/a
Plants: provide species and strain, unique accession		
number if available, and source (including location		\checkmark
for collected wild specimens)		
Microbes: provide species and strain, unique		
accession number if available, and source		\checkmark
Human research participants	Yes (indicate where provided: section/paragraph)	n/a
Identify authority granting ethics approval (IRB or	res (indicate where provided, section, paragraph)	II/a
equivalent committee(s), provide reference number		
for approval.		×
Provide statement confirming informed consent		
obtained from study participants.		\checkmark
Report on age and sex for all study participants.		· ·

<u>Design</u>

Study protocol	Yes (indicate where provided: section/paragraph)	n/a
For clinical trials, provide the trial registration		
number OR cite DOI in manuscript.		\checkmark
Laboratory protocol	Yes (indicate where provided: section/paragraph)	n/a
Provide DOI or other citation details if detailed step-	· · · · (
by-step protocols are available.		\checkmark
Experimental study design (statistics details)	Yes (indicate where provided: section/paragraph)	n/a
State whether and how the following have been		
done, or if they were not carried out.		
Sample size determination		\checkmark
Randomisation		
Blinding		
Inclusion/exclusion criteria		\checkmark
Sample definition and in-laboratory replication	Yes (indicate where provided: section/paragraph)	n/a
State number of times the experiment was		
replicated in laboratory		\checkmark
Define whether data describe technical or biological		
replicates		\checkmark
Ethics	Yes (indicate where provided: section/paragraph)	n/a
Studies involving human participants: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.		~
Studies involving experimental animals: State details of authority granting ethics approval (IRB or equivalent committee(s), provide reference number for approval.		~
Studies involving specimen and field samples: State if relevant permits obtained, provide details of authority approving study; if none were required, explain why.		~
Dual Use Research of Concern (DURC)	Yes (indicate where provided: section/paragraph)	n/a
If study is subject to dual use research of concern,		
If study is subject to dual use research of concern, state the authority granting approval and reference		\checkmark

Analysis

Attrition	Yes (indicate where provided: section/paragraph)	n/a
State if sample or data point from the analysis is excluded, and whether the criteria for exclusion were determined and specified in advance.		~
Statistics	Yes (indicate where provided: section/paragraph)	n/a
Describe statistical tests used and justify choice of tests.	Analysis of the plans : T-test	
Data Availability	Yes (indicate where provided: section/paragraph)	n/a
State whether newly created datasets are available, including protocols for access or restriction on access.		~
If data are publicly available, provide accession number in repository or DOI or URL.		~
If publicly available data are reused, provide accession number in repository or DOI or URL, where possible.		~
Code Availability	Yes (indicate where provided: section/paragraph)	n/a
For all newly generated code and software essential for replicating the main findings of the study:		~
State whether the code or software is available.		
If code is publicly available, provide accession number in repository, or DOI or URL.		~

Reporting

Adherence to community standards	Yes (indicate where provided: section/paragraph)	n/a
MDAR framework recommends adoption of discipline-specific guidelines, established and endorsed through community initiatives. Journals have their own policy about requiring specific guidelines and recommendations to complement MDAR.		~
State if relevant guidelines (eg., ICMJE, MIBBI, ARRIVE) have been followed, and whether a checklist (eg., CONSORT, PRISMA, ARRIVE) is provided with the manuscript.	ICMJE guidelines were followed, as the journal follows ICMJE recommendations for publication.
