

## Data Sharing Statement

<b>Article Info</b>	<a href="http://dx.doi.org/10.21037/amj-21-15">http://dx.doi.org/10.21037/amj-21-15</a>	
<b>Item</b>	<b>Question</b>	<b>Authors' Response (place "-" if not applicable)</b>
1	Would you like to share data collected for your study to others?	Raw data is available upon request but will not be submitted with the manuscript at this time.
2	If not, would you like to share the reason for your decision?	Our current data collection tool from our institution includes patient medical record numbers which are protected health information.
3	What data in particular will be shared?	All relevant statistical data is included in manuscript.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	IRB application and approval forms may be shared if requested.
5	When will data availability begin?	From the date of publication.
6	When will data availability end?	Two years within the publication date.
7	To whom will you share the data?	Editors of article or epidemiologists and hepatologists interested in expanding on this research.
8	For what type of analysis or purpose?	For meta-analysis or to aid in designing a similar or expanded study.
9	How or where can the data/documents be obtained?	By contacting the corresponding author via e-mail at <a href="mailto:Jeremy.hess@nhrmc.org">Jeremy.hess@nhrmc.org</a>
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
