Review Comments

Concise and clear description of the condition, and its treatment.

It would be useful to include a brief explanation as to why Isotretinoin is useful in the treatment of this condition.

Reply: We agree with the recommendation. See page: 3; lines: 4-7: fortunately, our patient had a good response to isotretinoin that might inhibit the adverse effects of chronic inflammation as fibroblast proliferation and migration, with the aim of avoiding damage to the dermal matrix.

There are no references provided with this submission.

It may be that for this article, references are not required, but a reference related to the use of Isotretinoin in the treatment of this condition might be helpful.

Reply: We added the requested reference. See page: 3; lines: 9-12: **Reference:**
